#### 1. Introduction

#### 1.1 Purpose

The purpose of this test plan is to describe the testing process of Lisoped.ua site (full URL <a href="https://lisoped.ua/">https://lisoped.ua/</a>). The document allows to get an idea of the planned work on project testing.

#### 1.2 Source data

Lisoped.ua – a site that allows the user to purchase a bicycle, as well as cycling and other sporting goods. The site also provides useful information about bicycles, bicycle parts and accessories in the form of articles and video reviews.

## 1.3 Scope

The purpose of testing the Lisoped.ua site is to check the correct operation of all its functions on different versions of browsers with typical use cases. A fraction of the time (20%) will be used to test atypical / potentially error-prone usage scenarios.

The result of the testing process will be the following materials:

- report of the testing team regarding the general state, giving the developers and managers of this product a picture of the site's correct operation in various browsers;
  - report of the results of testing the current coverage, typical use cases / browsers;
  - documented bugs in the bug tracker of the customer;

Testing will be done manually, by the ad-hoc testing method from the perspective of the end user of the site.

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

# 2. Conditions for testing

The website should satisfy the user's need for activities related to the choice and purchase of goods, obtaining comprehensive information about the product.

## 3. Testing strategy

The following test plan is formal, as understanding of the current state of the project is needed to build a detailed plan. As a result of the first run of functional tests, changes and improvements will be made to the test plan. The first run of the functional tests will give a clear idea of the level of stability of the system and the set of tests that will be performed in each configuration will be clearly defined.

This approach will give an opportunity to get a detailed report on the product being tested and to focus maximum attention on narrow places.

The customer will be provided with daily reports on the progress of testing, defects found, suggestions for improving the work of the product and its design. All detected defects will be reported to the customer's tracker as separate tickets for subsequent correction.

In the process of testing the Lisoped.ua site ad-hoc testing will be applied due to the lack of strict specification, as well as due to limited resources for the formalization of tests.

#### Five stages of the testing process are planned:

- the first stage is to analyze the technical requirements, develop a test plan, and run the functional tests partially;
- second stage will be devoted to a detailed run of the functional tests with the detection and description of defects;
- at the third stage, cross-browser compatibility testing will be performed with a description of the defects found;
  - the fourth stage is to check the bugs fixed by the developers and conduct regression testing;
  - the fifth stage is to test the product design with a description of the defects found.

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

Thus, maximum detailing of the testing depth is achieved, which, in turn, allows to determine the spent resources more accurately, as well as allows project developers to correct defects at the earliest stages.

#### OS, approved for testing:

- Windows 10
- Windows 11
- macOS 12.0 Monterey

#### Browsers, approved for testing:

- Microsoft Edge 105.0.1343.33
- Google Chrome 105.0.5195.102
- Opera 90.0.4480.84
- Firefox 104.0.2
- Safari 14.0. 3.

The security testing and the stress testing are not conducted due to lack of testing time.

## 3.1 Testing types

# 3.1.1 Functional testing

#### **Objective:**

Identify functional errors, inconsistencies with the requirements and expectations of the user through the implementation of standard as well as non-trivial test scenarios.

#### **Process description:**

#### **Registration / Authorization**

- User registration
- User authorization
- Password recovery

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

#### **Profile**

- Profile editing
- Deletion of the account
- User logout from personal account

#### **Subcribe form**

- Field Validation
- Sending request on Subscribing

#### Search

• Search by goods title

#### Blog

- Sharing of articles in Facebook
- Leave a comment

## **Product Filtering**

- Filtering by price
- Filtering by avaible parameters

#### **Product Page**

- Add to wishlist
- Add to compare list
- Leave the feedback
- Buy
- Buy in installments

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

#### **Product Cart**

- Add to cart
- Remove from a cart
- Change quantity of goods in the cart
- order amount calculation

## Placing An Order

- Fields Validation
- Change payment type
- Placing an order

## **Online Payment**

- Transfer to payment page after placing an order
- order amount calculation
- Making a payment

## 3.1.2 Cross-browser testing

## **Objective:**

Check the correct operation and design of the project in various browsers.

#### **Browsers**

- Microsoft Edge 105.0.1343.33
- Google Chrome 105.0.5195.102
- Opera 90.0.4480.84

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

- Firefox 104.0.2
- Safari 14.0. 3.

# 3.1.3 Regression testing and verification of fixed defects

## **Objective:**

Checking the changes made on the site in order to make sure that the new version does not contain errors in the already tested parts of the site.

In the course of regression testing, the following types of tests will be conducted:

- Verification Tests
- Version testing
- Testing related functionality

## 3.1.4 Testing the design

#### **Objective:**

Verification of product design compliance with specifications

#### **Process description:**

- Registration form
- Personal account
- Site pages

Site Lisoped.ua	Version: 1.0
Test Plan	Date: 13.09.22

# 4. Testing schedule

Task	Workload	Start date	Expiration date
Making a test plan	12 hours	13.09.2022	19.09.2022
Test execution			
Test Analysis			
Summarizing			

## 5. Final results

#### 5.1 Resume

The final result of the testing should be the complete summary consequence of testing process with the described defects and recommendations for the improvement of the product from the perspective of the end user.
